## Site Automation Prevention

In an attempt to prevent site unauthorized systems from using robots and other automated systems to collect Data from Hawaii.Gov's Servers We've implemented a captcha service for certain URL's. This has many benefits first, the captcha service will prevent damage to our servers from automated system that overload services and prevent real users from using it. Also the reCaptcha service Hawaii.Gov uses actually benefits us all by having humans decipher text from digitally scanned books that computers can't figure out. You can learn more about the service by going to [ReCaptcha.org](http://ReCaptcha.org).
