

Project Summary

Department of Land and Natural Resources, Hunter Education Division

Project Name: Hunter Education and Records Management System SOW Amendment 9

Business Model: FIXED RATE

Project Overview

Problem - Currently hunters can purchase multiples of the same tag in one transaction. However, if a hunter wants to purchase several different types of tags, they need to purchase each type of tag through separate transactions.

Solution – Build shopping cart functionality so hunters can add multiple types of tags to a shopping cart and pay them online through one transaction.

Currently the transaction fee, \$1 per tag/permit plus credit card fee, is passed on to the user. Going forward the STATE will absorb the transaction fee for all transactions.

Additional Benefits – Streamlined process to make the user experience faster and easier with less expense.
